BUBBLE

During the pandemic, it is possible for some people to form support or childcare bubbles.

A [support bubble](#) is usually a support network between a household with only one adult in the home (a single-adult household) and one other household of any size. It allows the two households to have close contact as if they were members of the same household. You can find more information about the types of support bubbles [here](#).

A childcare bubble is where one household links with one other household to provide informal childcare. You can find more information about the types of childcare bubbles [here](#).

AGPREV1

Before this study, had you/had your child previously taken an antigen swab test to see if you/they had COVID-19?

An antigen test indicates whether you currently have the COVID-19 virus. This could be either a PCR swab test of the nose and throat where the test goes to a laboratory, or a lateral flow swab test (of your nose only, or of nose and throat) where you get the results in less than an hour, without the test going to a laboratory.

Please do not include any antibody tests that show if you/they have had COVID-19 in the past. Just include tests that show if they have the virus at the time of the test.
