

# REACT-CYP Information sheet for children

We would like you to answer some questions on the computer to help us understand more about you – this is called a survey. We would also like you to do some brain games.

We want to learn more about how you have been affected by things during the pandemic like catching the Covid-19 virus, staying at home all the time, or not seeing your friends or going to school.

Your answers to the questions will help us understand how the pandemic might have changed people's brains, bodies, or feelings.

We will look at your answers along with answers from lots of other children like you to see if they feel the same.
