Imperial College London

Digital Maternity Leaders

Profile Book

Cohort 1

INSTITUTE OF GLOBAL HEALTH INNOVATION

2022–23

Introduction

The PG Cert in Digital Health Leadership (Digital Maternity Leaders) is the new flagship programme by Imperial College London's Institute of Global Health Innovation and NHS England.

The course aims to develop a new generation of digital changemakers who will drive information and technological transformation in maternity service delivery across NHS England. Digital leaders will gain the knowledge and skills to implement transformational change, providing safer and more personalised services.

Imperial College London is committed to working with NHS England to make NHS maternity care the safest service possible for parents and infants. Digital technology can enhance the quality, accuracy, and accessibility of maternity services to women and their families.

The PG Cert in Digital Health Leadership (Digital Maternity Leaders) is a 9-month part-time programme designed to equip every participant with the essential knowledge to lead any digital transformation projects through a mix of online and in-person teaching.

Our current cohort is a diverse mix of NHS employees spanning the whole of England from various backgrounds working in maternity services.

In this programme, we are not only equipping every participant with the essential knowledge to lead digital transformation projects in their own role department but also gain unique insights and learn about the latest development in maternity services from Imperial College London's world-class faculty and experts.

Joanne Birtwhistle
Specialist Digital Midwife

Primary Region of Work:
East of England

Work Area Focus:
Maternity Services, Data reporting locally and regionally,

Neonatal Services, Implementation and transformation of EPRs, Training and maintenance of MIS, Community infrastructure support and trouble shooting, Clinical advisor between Hospital IT support services and maternity, Report to local LMNS, Member of the East of England Digital Midwives Expert reference group.

Lisa Brocklehurst
Lead Digital Midwife

Primary Region of Work:
East of England

Work Area Focus:
Process mapping both 'as-is' and 'to-be' processes, providing gap-analysis work championing the use of Digital systems within the maternity setting. My role includes, developing and reviewing system related user operational policies as necessary, carrying out impact and risk assessments, education, training and development and Health and Safety Management Plans, reporting. I am working towards the ambitions of Better Births, evaluating the electronic maternity system and its ability, as an enabler, to meet the recommendations to drive up patient safety. I was key in developing the Maternity Digital Strategy for the trust, ensuring that this represents an addendum to the wider Trust Digital Strategy.

Molly Davis
