

Imperial College  
London

Science  
Friday

Dr. Fouzia Khan holds the position of Senior Teaching Fellow in the Faculty of Medicine at Imperial College London.

She is a director of the Drug Student Research Network, part of the college-wide Student Research Network, facilitating cross-disciplinary learning and skill development for PhD and Master students through various activities and events.

Dr. Stephen G. Gray is an alumni of the Bioengineering department. He is now an active mentor to MBA students at MIT Sloan School.

Since leaving his PhD at Imperial, Stephen has continued to build more companies including Orobionics BV, Cybosense BV, Vulpine Labs Inc, HLO.BIO Inc, Nukaryo, Cartallum Blockchain

**FRIDAY, 29 SEPTEMBER**  
**5:30 PM**

ROYAL SCHOOL OF MINES. SOUTH KENSINGTON

## Drug Student Research Network (DSRN)

The Drug Student Research Network at Imperial College London unites students across various disciplines related to drugs and medicine, fostering collaboration, cross-disciplinary learning, and personal and professional development. It addresses the complexities of drug research by bringing together students from diverse backgrounds, encouraging the exchange of ideas and knowledge

## A journey from PhD at Imperial College London Bioengineering to founding 7 start-up companies

### Lessons from ten years of failure and success as a PhD Alumni of the Bioengineering department

Dr. Stephen G. Gray is an alumni of the Bioengineering department. During his time at Imperial he founded one of the world's first bioprinting companies Ourobotics Ltd in 2013 that disrupted the industry.

He is currently founder & CEO of NouBio Inc; a company that has created bio-intelligent manufacturing products for cell based vaccines, cultivated meat, and cellular therapies.

Pizza and drinks will be provided as usual.
