

Research Data Management (RDM) Working Group Terms of Reference and Membership

Terms of Reference

1. To develop a College level position on Research Data Management (RDM), including planning, curation and sharing.
2. To develop the College's external relations strategy with regard to RDM, including research funders and other interested parties, and to embrace a key influencing role to optimise the RDM national agenda.
3. To ensure College engagement in the implementation of any of the College's RDM recommendations and to ensure compliance where required.
4. To explore the opportunities and future needs for open data publishing (in consultation with the Open Access Publishing Group as relevant).
5. To report to the Provost Board at least quarterly.
