

[Solution home Symplectic Elements How To](#)

How to create links

Modified on: Mon, 30 Nov, 2020 at 9:35 PM

Creating links

When you log into your Elements profile, you may see either a series of tasks in a carousel or banners displayed at the top of your home page. One of these is a prompt to create Links between publications and other items in the system.

MY ACTIONS (6 of 11)

Link your scholarly & creative works to funding

Linking your scholarly & creative works to the associated funding captures this information ready for reporting activities.

LINK

Clicking on the link takes you to the **Create links** page, which can also be reached via **My Profile > Tools > Create Links**.

Create links

Create links between...

Published before: 

Creating a relationship between two items -- an article and a grant, for example -- only requires a couple of clicks. After you have filtered the items to bring up the correct article and grant, check the items. This will prompt Elements to open the "Click to create" menu.

You have selected to link:

- Multi-Site Photoplethysmography Technology for Blood Pressure Assessment: Challenges and Recommendations. with

- Beyond the diffraction limit: Sub-diffraction T-ray biochip sensing using planar metamaterials

[Create one new link](#)

If a publication was supported by multiple grants, they can all be selected at this point and linked; however, if you attempt to link items that already have a relationship, Elements will display an error message.

2 links cannot be created.

These links already exist.

- **Citation:** Mu, M., et al.(2011), Daily and 3-hourly variability in global fire emissions and consequences for atmospheric model predictions of carbon monoxide, J. Geophys. Res., doi: 10.1029/2011JD016245, in press. with

- Gene-expression connectivity mapping and its application in phenotypic targeting
 - Intuitive Large-scale Image Processing for Biologists

If the brief citation in the "Results" view does not provide enough information for you to decide on its relationship to other items, click on the **View** icon, which will open the full item in a separate tab.

Adding an item from the "Create links" page

If you wish, you can add a new item directly from the "Relationships" tab. Click the big blue + icon in the lower right-hand corner and then, from the subsequent screen, select the object type. Only available modules will be presented.

The resulting "Create Links" page will have the object where you began pre-selected. The Current filters will always default to items linked to your account with a date range set to the previous three years.

The Current filters can be broadened by clicking the "Change" button. In particular, if an expected item is not presented when you are the user, try changing the "Linked to" filter from your name to "Anyone."
