

Aviation in 2030

Nadine Pilon

Wednesday, 06 May 2009 - 17:30

Location: Room 316, Skempton (Civil Eng) Bldg, Imperial College London

Abstract

Society in 2030 will be more populated and inter-connected. What will be air transport at that horizon? What challenges are perceived on the way? The seminar will provide a high level perspective based on recent studies at European level.

Biography

Nadine Pilon holds a PhD in Computer Sciences and has worked for 10 years in Systems Analysis. In 1994 she joined EUROCONTROL where she has been Manager of Safety Research, then deputy Manager for the Society-Environment-Economy Research Area, setting-up the Society research domain.
