CONTINUOUS DELIVERY

RELIABLE SOFTWARE RELEASES THROUGH
TEST, AND DEPLOYMENT AUTOMATION

JEZ HUMBLE
DAVID FARLEY

POSTED ON AUG 31, 2017 TO DEVELOPER TOOLS, WEB

Rapid release at massive scale

By Chuck Rossi

Over time, the software industry has come up with several ways to deliver code faster, safer, and with better quality. Many of these efforts center on ideas such as continuous integration, continuous delivery, agile development, DevOps, and test-driven development. All these methodologies have one common goal: to enable developers to get their code out quickly and correctly to the people who use it, in safe, small, incremental steps.

The development and deployment processes at Facebook have grown organically to encompass many parts of these rapid iteration techniques without rigidly adhering to any one in particular. This flexible, pragmatic

OVER-THE-AIR MAGIC —

Tesla's over-the-air brake upgrade was amazing—and also a bit worrying

Over-the-air update improves Model 3 braking distance by up to 20 feet.

TIMOTHY B. LEE · 5/31/2018, 9:48 PM

Tesla

Enlarge / Interior of Tesla's Model 3.

331

Tesla pushed out a software update to Model 3s that dramatically improved the car's braking performance in certain conditions. The update came days after *Consumer Reports* announced that it could not recommend the vehicle based on inconsistent—and sometimes quite poor—braking performance.

This week, after the update had gone out, Consumer reports tested its car again and found the braking had improved. As a result, the organization is now **recommending the Model 3**.

Cross-Timezone Course Schedule

March 30th

	What	Duration		 (+1)	 (+2)	 (+7)
1	Global Meeting	~ 20min	09:00	10:00	11:00	16:00
2	Scrum Meeting	~ 20min	09:30	10:30	11:30	16:30
3	Development	Rest of Day	10:00	11:00	12:00	17:00

March 29th

	What	Duration		 (+1)	 (+2)	 (+7)
1	Introduction to JASS 2021, Organization, Schedule, Meeting Management, Problem Statement	~ 20min	09:00	10:00	11:00	16:00
2	Icebreaker	~ 20min	09:20	10:20	11:20	16:20
3	Introduction to DevOps	~ 20min	09:40	10:40	11:40	16:40
4	Break (20min)					
5	Hello Ducks	~ 20min	10:20	11:20	12:20	17:20
6	Hello Drones	~ 20min	10:40	11:40	12:40	17:40
7	Hello Smartie	~ 20min	11:00	12:00	13:00	18:00

March 30th - April 1st

	What	Duration		 (+1)
1	Global Meeting	~ 20min	09:00	10:00
2	Scrum Meeting	~ 20min	09:30	10:30
3	Development	Rest of Day	10:00	11:00

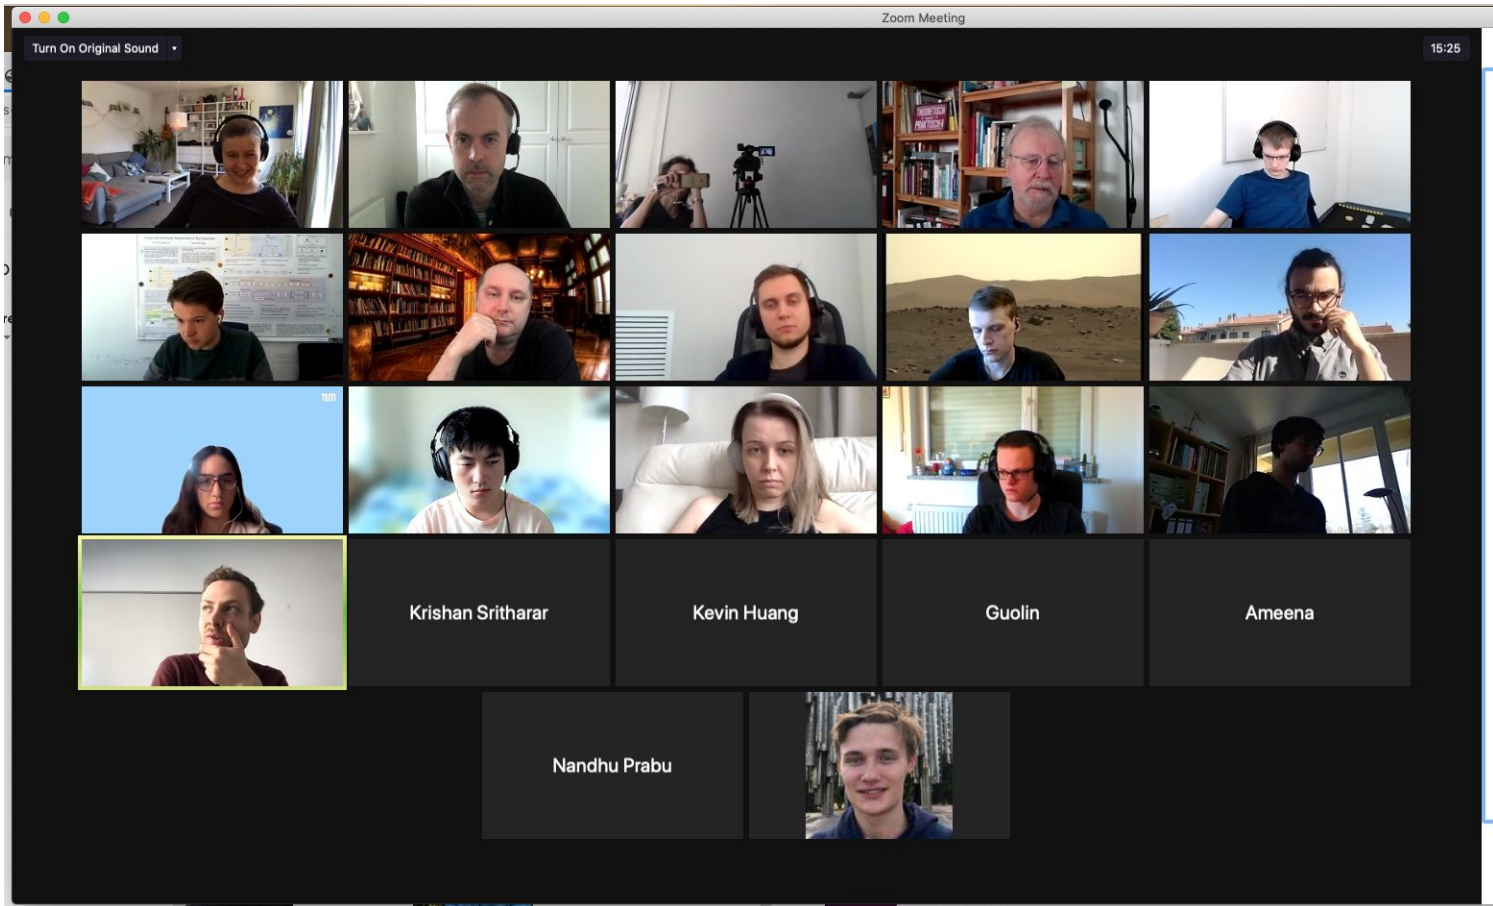

April 2nd - April 5th

Self organized work.

April 6th

	What	Duration		 (+1)	 (+2)	 (+7)
1	Global Meeting	~ 20min	09:00	10:00	11:00	16:00
2	Scrum Meeting	~ 20min	09:30	10:30	11:30	16:30
3	Demo (10 minutes per team + 5 minutes questions)	~ 45min	14:00	15:00	16:00	21:00

Ameena

My schedule (as a student in London):

9am	Global, Scrum meetings
10am	Post Scrum meeting, (debugging across pairs)
11am	Lunch
12nn	Work on pair's goals
6pm	Wrap up - nothing broken, last commits, bragging on Slack about achievements (updates)
7pm	End of day

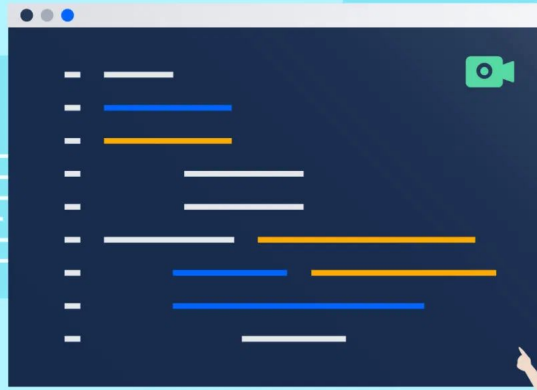

The screenshot shows a GitHub Wiki page titled 'Home' for the repository 'JASS-2021 / smart-infrastructure'. The page content includes a welcome message, a table of recent updates, and a section on 'Munich Deployment Setup'. The table lists activities from the 29th to the 30th. The deployment setup section describes a blue-green deployment process on a Raspberry Pi. The right sidebar contains a 'Pages' section with links to 'Home' and 'Update process', and a 'Clone this wiki locally' button with a URL.

When	What
29th	Introduction + technical set up
30th	Setting up deployment
30th	Setting up pipeline

- GitHub Wiki to track progress, due to fast pace
- Learnt about how continuous development would work in a real-life project
- Multiple time zone collaboration put me in good stead for the rest of the year
