Programme Overview

The MSc in Global Health Management is a full-time programme of 12 months duration. The programme comprises 17 modules. The focus of the programme is on health with the emphasis on strategies to promote health, together with an international orientation. The programme content reflects the contemporary and relevant management and analytical skills necessary for managing in turbulent environments and complex health ecosystems, both in high- and low and middle- income countries. In particular, the programme will equip participants with conceptual and practical skills and enable them to analyse and solve challenging problems.

The programme offers the possibility of specialising in one of three concentrations i) Management; ii) Innovation and Entrepreneurship; iii) Economics and Data Science. The concentrations and the diversified pool of electives from different disciplines (e.g. STEM, Analytics, Management, Leadership) enable a balance between soft and analytical skills development, consolidation of curricular offer in key areas of relevance in health ecosystems and personalised tailoring of the programme to students' aspirations in terms of personal and career developments.

The programme combines academic rigour and practical relevance. There is a careful balance of teaching and learning, individual and group work. Case study methodology, class-based discussions and projects sponsored by external organisations and initiatives are used to strengthen the conceptual, analytical, and problem-solving skills of the participants in real situations. In addition, there are regular seminars by external expert speakers.

Before you start the programme, you are given access to on-line interactive primers in Maths, Accounting, Coding and Study Skills to prepare you for your compulsory module content. You also take the Career Development Module throughout the year. These modules are non-assessed but you are strongly encouraged to complete them.

You are required to complete the Plagiarism Awareness primer as part of their programme.

Learning Outcomes

The programme aims/objectives are to provide a one-year programme in global health management that will equip students with the knowledge and skills to effectively manage and lead healthcare organisations in both public and private domains, or to pursue further academic study (doctoral research). Experienced entrants (typically practitioners) will be prepared to move into management or to accelerate their managerial careers.

Upon successful completion of the programme, you will be able to:

- Appraise and analyse evidence from across multiple fields to assess current global health challenges, their drivers and how they impact society;
- Select analytical techniques and apply critical thinking to create sustainable solutions for contemporary health challenges and present the analysis and proposed solutions clearly and persuasively;
- Show development of a set of personal and lifelong learning skills applicable to health ecosystems environments.

Global Health Management

In addition to the above learning outcomes, upon successful completion of this stream, you will be able to:

- Evaluate the workings and strategies of healthcare organisations, the complex external context in which they operate and how they are managed;
- Select and apply analytical techniques to support and direct healthcare organisations decision-making processes;
- Use critical thinking skills to generate feasible and sustainable solutions for healthcare management challenges and present them effectively and compellingly;
- Effectively work in teams and manage change and innovation in healthcare organisations.

Global Health Management (Economics and Data Science)

In addition to the above learning outcomes, upon successful completion of this stream, you will be able to:

- Demonstrate a deep knowledge of the fundamentals of economics and their application to strategies to address health and healthcare challenges;
- Select and apply analytical, quantitative and problem-solving techniques to the decision-making process in health ecosystems;
- Develop data-driven solutions to support decision-making in real-world settings with a holistic view of drivers of health challenges and mitigation strategies;
- Select, appraise and curate data and evidence to most effectively support decision making in health ecosystems including policy making, as well as the exploration of new ideas to create new sustainable business models.

Global Health Management (Innovation and Entrepreneurship)

In addition to the above learning outcomes, upon successful completion of this stream, you will be able to:

- Demonstrate relevant knowledge of innovative organisations, how they are managed and the complexity of the health ecosystem within which they operate;
- Develop skills and an entrepreneurial mindset to launch and support innovative ventures, and healthcare organisations through periods of change
- Apply critical thinking in ideation, horizon scanning, business model development, financial management and pitching ideas to potential investors and stakeholders.
- Develop an entrepreneurial mindset, creativity, resilience and willingness to take calculated risks.

The Imperial Graduate Attributes are a set of core competencies which we expect students to achieve through completion of any Imperial College degree programme. The Graduate Attributes are available at:

www.imperial.ac.uk/students/academic-support/graduate-attributes

Entry Requirements

Academic Requirement	Normally a UK Honours Degree at 2:1 or equivalent in Medicine, Health Sciences, Social Sciences, Physical Sciences Engineering, Informatics or another relevant discipline (including Business, Management & Law). However a 2:2 can be accepted if combined with relevant work experience. A strong quantitative background is recommended for the Economics & Data Science pathway. The Business School does not award credit for Prior Learning (Recognition of Prior Certified Learning (RPCL) or Recognition of Prior Experiential Learning (RPEL)).
Non-academic Requirements	Personal Statement CV Two referees Career Planning Questions
English Language Requirement	Higher requirement (PG) IELTS score of 7.0 overall (minimum 6.5 in all elements).
Admissions Test/Interview	Students are required to take an online interview via the Kira Talent platform. All interviews are reviewed and scored as part of the Admissions process.

The programme's competency standards documents can be provided upon request.

Learning & Teaching Approach

Learning and Teaching Delivery Methods

The programme combines academic rigour and practical relevance. There is a careful balance of teaching and learning, individual and group work.

Independent learning

You are expected to spend significant time on independent study outside of directed learning time on the HUB. This will typically include accessing resources online, reading journal articles and books, undertaking research in the library, reviewing lecture notes and watching lecture recordings, working on individual and group projects, working on coursework assignments and revising for exams.

Scheduled Teaching Methods

- Lectures
- Practical classes and field work
- Equipment/technique demonstrations (e.g. Bloomberg, Datastream)
- Seminars
- Workshops
- Case studies
- Group work exercises
- Formal presentations

E-Learning and Blended Learning Methods

- Pre-programme VLE modules
- On-line discussion forums
- On-line lecture materials
- Interactive content including video and module quizzes

Projects

You are required to undertake a Work Placement or Healthcare Sector Report as the final summative piece of your degree.

Overall Workload

The students' overall workload consists of directed online learning sessions and independent learning. While actual contact hours may vary according to the elective modules a student chooses to study, the following gives an indication of how much time is needed to allocate to different activities at each level of the programme. At Imperial, each ECTS credit taken equates to an expected total study time of 25 hours. Therefore, the expected total study time is 2250 hours per year.

On average during the programme, students are expected to spend around 20% of their time on directed learning, 80% on independent study and group work. There are typically 100 students on the programme and group work is normally conducted in syndicate teams 3-6 students

Assessment Strategy

Assessment Methods

Modules will be assessed by one or more of the following types of assessment methods:

- Essays
- Continuous assessments
- Written Examinations/Tests
- Multiple Choice Tests
- Formal Presentations
- Reports
- Case Studies
- Class Participation

Assessed modules comprise coursework that is designed to help you master key elements of the subject and, in part, to help prepare you for the final assessment, which is typically a report or examination. Examinations are scheduled throughout the year, generally at the end of the term the module is taught or at the start of the subsequent term. Exact timings are detailed in the programme overview section above. The format of examinations may be written, computer-based or timed remote assessment.

Coursework weighting varies among modules. The various assessments allow you to demonstrate that you have met the intended learning outcomes for each module and these collectively contribute towards your achievement of the programme's learning outcomes, detailed above.

Assessments are designed to ensure that you have acquired the core knowledge and skills expected of a Business School graduate and that you are able to apply these in your career aspirations upon completion of the programme

Balance of assessment

Compulsory (core) modules

	Management Stream	Innovation and Entrepreneurship Stream	Economics and Data Science Stream
Coursework	36%	66%	52%
Exam	37%	34%	48%

Electives

Variable by choice of elective modules

Academic Feedback Policy

Feedback can take many forms. During lectures and classes, you will receive verbal feedback on the ideas that you contribute to discussions and on in-class presentations. The online teaching materials contain exercises with built-in, immediate, feedback that is received when you submit an answer.

The School aims to provide feedback on coursework within two weeks. This will be sent in written form to the individual or the group, as appropriate. Academic staff may also provide verbal feedback of a general nature in class or posted to our virtual learning environment. Office hours offered on all modules also provide an opportunity for individual feedback.

The School aims to provide provisional examination grades twenty-five days from the end of the examination period. General feedback to the cohort is provided on examination performance, usually in written form. If you need to resit an examination, you may also approach the module leader for feedback on your performance in the first sitting.

You will be provided with a percentage grade for coursework and examinations with the final numerical mark only confirmed after the Board of Examiners Meeting and then released by Registry. Grades received during the year are deemed provisional until confirmed by the Final Board of Examiners.

The College's Policy on Academic Feedback and guidance on issuing provisional marks is available at: www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

Re-sit Policy

The College's Policy on Re-sits is available at: www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

Mitigating Circumstances Policy

The College's Policy on Mitigating Circumstances is available at: www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

Additional Programme Costs

This section should outline any additional costs relevant to this programme which are not included in students' tuition fees.

Description	Mandatory/Optional	Approximate cost
Global Health Immersion – experience first-hand the challenges and cultural dynamics of healthcare management practices in another country	Optional	£500 + Own Transport, approximately £1000

Important notice: The Programme Specifications are the result of a large curriculum and pedagogy reform implemented by the Department and supported by the Learning and Teaching Strategy of Imperial College London. The modules, structure and assessments presented in this Programme Specification are correct at time of publication but might change as a result of student and staff feedback and the introduction of new or innovative

approaches to teaching and learning. You will be consulted and notified in a timely manner of any changes to this document.

Programme Structure - MSc Global Health Management

FHEQ Level 7

You will study all compulsory modules. Additionally, you must study elective modules to the value of 15 ECTS from Group A and one Group B elective.

Progression and Classification

Award and Classification for Postgraduate Students

Award of a Postgraduate Degree (including MRes)

To qualify for the award of a postgraduate degree a student must have:

1. accumulated credit to the value of no fewer than 90 credits across levels 6 and 7 (of which 75 credits must be at Level 7);
2. and no more than 15 credits as a Compensated Pass;

Classification of Postgraduate Taught Awards

The College sets the class of Degree that may be awarded as follows:

1. Distinction: 70.00% or above.
2. Merit: 60.00% or above but less than 70.00%.
3. Pass: 50.00% or above but less than 60.00%.

For a Masters, your classification will be determined through the Programme Overall Weighted Average meeting the threshold for the relevant classification band.

Your degree algorithm provides an appropriate and reliable summary of your performance against the programme learning outcomes. It reflects the design, delivery, and structure of your programme without unduly over-emphasising particular aspects.
