

# Gastroenterology & Hepatology Clinical Research Training (CRT) Programme 2022/23

## The Programme

- Offers comprehensive training in how participate in, and lead clinical research as an NHS consultant
- Is suitable for all trainees in Gastroenterology and Hepatology, and does not require time out of training

### **1. Hands on experience**

Recruiting patients to major studies  
Being part of your local NHS research team  
Can be evidenced by taking part in NIHR Associate PI Scheme, if desired

### **2. Online Course: Principles and practice of clinical research**

Critical appraisal modules  
Understanding how studies are delivered in the NHS  
Q+A with research-active consultants

### **3. Live Group Event: Leading your own research**

Converting clinical problems into research questions  
Developing a research proposal  
Pitching proposals in the Dragon's Den

## The Requirements

- Your current clinical placement is in a research active department, where the local team can provide supervision
- You can spend at least 6 months contributing to local research, to gain sufficient practical experience

## The Details

- Online materials will be available from October 22,
- Group event (virtual) will be on Wed 2<sup>nd</sup> November
- All parts of the CRTP must be completed by July 23
